EXPERIENCE

Working Student IT Operations

DrSmile

📅 05.2022 - Ongoing 📍 Berlin, Germany

- Successfully orchestrated an international office network deployment, demonstrating strong negotiation skills while liaising with multiple parties over a period of 4 months. Responsibilities included contract negotiations, hardware procurement, overseeing the installation of fiber internet as well as network architecture and design. Implementation included a network infrastructure using a strategic blend of Cisco Meraki and Ubiquity equipment.
- Remotely migrated users to mobile accounts, incorporating TOTP-based MFA within an automated and compliant device setup, completing the project within a tight timeline of 3 weeks.
- Designed and implemented M365 groups, application deployments, and policies for a substantial tenant comprising 500+ users.
- Implemented the deployment of macOS and iOS apps, profiles, and certificates utilizing Jamf, enhancing device management efficiency.
- Spearheaded the establishment of another fully functional network for an office environment, utilizing a combination of Cisco Meraki, Ubiquity, and TP-Link hardware.
- Collaborated closely with developers of specialized medical equipment software, devising a customized deployment methodology using Microsoft Intune.
- Skillfully negotiated hardware orders, fostering a valuable partnership with a Lenovo supplier for the delivery of cloud managed, pre-autopiloted devices.
- Introduced and modernized Atlassian tool utilization across several departments, optimizing collaboration and streamlining workflow processes.
- Resolved various Google Workspace SMTP and group-related issues, utilizing troubleshooting expertise to ensure seamless operations.
- Assumed responsibility for the headhunting and recruitment process, and demonstrated exceptional screening and interviewing skills, resulting in the successful selection and onboarding of highly qualified candidates.
